Searching: **ALL databases**  
[Change Database](#)**Your search did not find any articles.** These tips can help:

- Verify the correct spelling of your search terms.
- If you're searching "Citations and Abstracts", try the same search in "Article text".
- If you're searching *Current (years)*, try the same search against the *Backfile* or vice-versa.
- If you're searching only one or two databases, use [Change Database](#) to add another or search ALL available databases.
- Remove any limit to **Full text articles** or **Peer reviewed**.
- If you're using [Basic](#) or [Guided Search](#), don't enter a question or long sentence. Instead, use the **AND** operator to link important words of the sentence together. For example, instead of *What is the largest continent on Earth?*, search for *largest AND continent AND earth*.
- Use [Natural Language Search](#) to enter a question in everyday English.
- Use [Search Options](#) on the *Preferences* page to expand your search to also look for synonyms, plurals, and spelling variants of your search terms.
- [Search Wizard](#) can help you build a precise search.
- Use the [Subject List](#) to find articles relevant to what you are looking for.
